SECRET/CONTROL/US OFFICIALS 25X1 Comment. The information on the units in Vladimirgenerally agrees with information 25X1 <u>Volvnsk</u> that a medium tank regiment was in the old Polish Horse-Drawn Arty Regt Barracks, that a mechanized regiment was in the former barracks of the Polish 45th Inf Regt, and that an AAA battalion was in the former Polish Cavalry Barracks in the fall of 1948. The refugee also said that construction of fortifications in the Korytnica - Uscilug sector started in the spring of 1948. Most of these fortifications were machine gun pillboxes, but some were concrete emplacements for light artillery. Weapons had not yet been mounted in the fall

of 1948. Comment. Numerous other reports have mentioned that a border guard company was in Uscilug. These reports have stated that the company was subordinate to a battal-ion in Korytnica, which is 28 km northwest of Vladimir-

Volynsk.
